

## **CUSTOM CAPABILITIES**

Committed to providing value as solutions, Arcadia can readily modify standard products or develop custom solutions as needed. By remaining responsive to ever-changing requirements, Arcadia's manufacturing capabilities makes short work of special needs to meet design, budget and time requirements with ease. Examples of our custom capabilities include:

- Modifying product dimensions (height, width, depth or scaled to fit)
- Interchanging components (e.g. applying legs from one series to another, as applicable)
- Utilizing alternate base designs (e.g. plinth base application, special legs, etc.)
- Applying non-standard technology units as well as addressing custom placement requirements
- Accommodating special fabrics and finishes
- Custom wood finish matching
- Foam density preferences
- Alternative seat mechanisms
- Corporate or team logo etched in glass table tops
- Corporate or team logo embossing or embroidery on seating products
- Custom product design

From initial project requirement identification, order processing, product engineering and manufacturing, to timely delivery and installation management, follow-up training and support, Arcadia has the relevant products, experience and expertise to manage the size and nature of any project.
