

TARGET CHEMICAL ELIMINATION DISCLOSURE

Arcadia and Encore are committed to producing sustainable, high-quality products that meet the stringent environmental and human health standards outlined in the BIFMA LEVEL® certification program. As part of this commitment, we actively evaluate and eliminate certain chemicals of concern from our products as follows.

Eliminated Chemicals

We have phased out and no longer utilize the following chemicals in the manufacture of our products:

- Perfluorinated Compounds
- Polyvinyl Chloride (PVC)
- Antimicrobials
- Formaldehyde
- Flame Retardants

We ensure compliance with these chemical restrictions through:

- Supplier declarations
- Material Safety Data Sheets (MSDS)
- Third-party testing and certification where applicable, including SCS Indoor Advantage Gold certification for the majority of Arcadia and Encore products
- Ongoing product development and material innovation

Please note: Since fabrics are selected by the customer, Arcadia Chair Company's Declaration that seating products are free from chemicals of concern expressly excludes upholstery. Arcadia Chair Company will gladly assist in the fabric selection process, assuring that they are free of Flame Retardants, PFAS and PVC.

We continue to assess new materials and manufacturing processes to further improve environmental responsibility while maintaining the durability and performance of our products. Please refer to the Arcadia | Encore Product Guide on the following pages for additional details.

For more information on our sustainability initiatives and chemical management policies, please contact us at 800.585.5957 or askus@arcadiacontract.com.

Arcadia | Encore Product Guide

The seating products referenced below are also SCS Global Services certified, meeting the requirements of ANSI BIFMA e3 credits 7.6.1 & 7.6.2, with the following exceptions: leather and vinyl upholstery, table components and tablet arms in veneer and laminate only.
