INTRODUCING

STASH™ ECO

A durable, hygienic and low maintenance folding chair created specifically for healthcare environments.

Engineered from High-Density Polyethylene (HDPE), Stash Eco is built for durability and easy upkeep. The high-performance material features a non-porous surface and strong resistance to harsh disinfectants, helping support infection control while delivering long-lasting performance.

SUPERIOR HYGIENE

Non-porous and moisture resistant, HDPE prevents the absorption of liquids, bodily fluids, and pathogens while resisting mold and mildew.

EXCEPTIONAL DURABILITY

Highly impact-resistant with a strong strength-to-density ratio. HDPE will not degrade over time, making it ideal for healthcare environments.

CHEMICAL & DISINFECTANT RESISTANT

Withstands frequent cleaning with hospital-grade disinfectants and bleach solutions without fading, cracking, or degrading.

LOW MAINTENANCE & SUSTAINABLE

Made with recycled materials, in a closed loop manufacturing process to minimize waste, HDPE is also highly recyclable, long-lasting and requires minimal upkeep.

CLEANING & CARE

- Daily Maintenance: Soft cloth with lukewarm water and mild detergent
- Disinfection: Diluted hospital-grade disinfectant or 10:1 bleach solution
- Stubborn Stains: Use a soft-bristle brush with mild soap solution
- Avoid: Steel wool, abrasive pads, or harsh solvents (strong acid or alkaline cleaners)
- Best Practice: Wipe surfaces dry after cleaning to prevent water spots
